Round It! Task Cards

Use these 32 short answer cards to help your students master rounding to the nearest ten through the nearest million. These cards are perfect for test prep and will work well at math centers, stations, for partner work, or with the whole class using a game like Scoot. A student answer sheet is included along with an answer key for self-checking. There is also a Challenge Card that can be used in conjunction with any other card to extend the activity.

The cards will look best in color, but will also print out fine in grayscale. Simply print and cut along the guidelines. Laminate and use them again and again. Alternatively, you could print on cardstock. It works well to keep them in a baggie. Another option is to hole-punch a corner of each card and put them all on a ring.

This resource addresses Common Core Standard 4.NBT.3

4.NBT.3. Use place value understanding to round multi-digit whole numbers to any place.

Rounding the nearest ten, hundred, and thousand for grade three (3.NBT.1) can be found in my [Teachers Pay Teachers Store](#)
