Easy to Assign

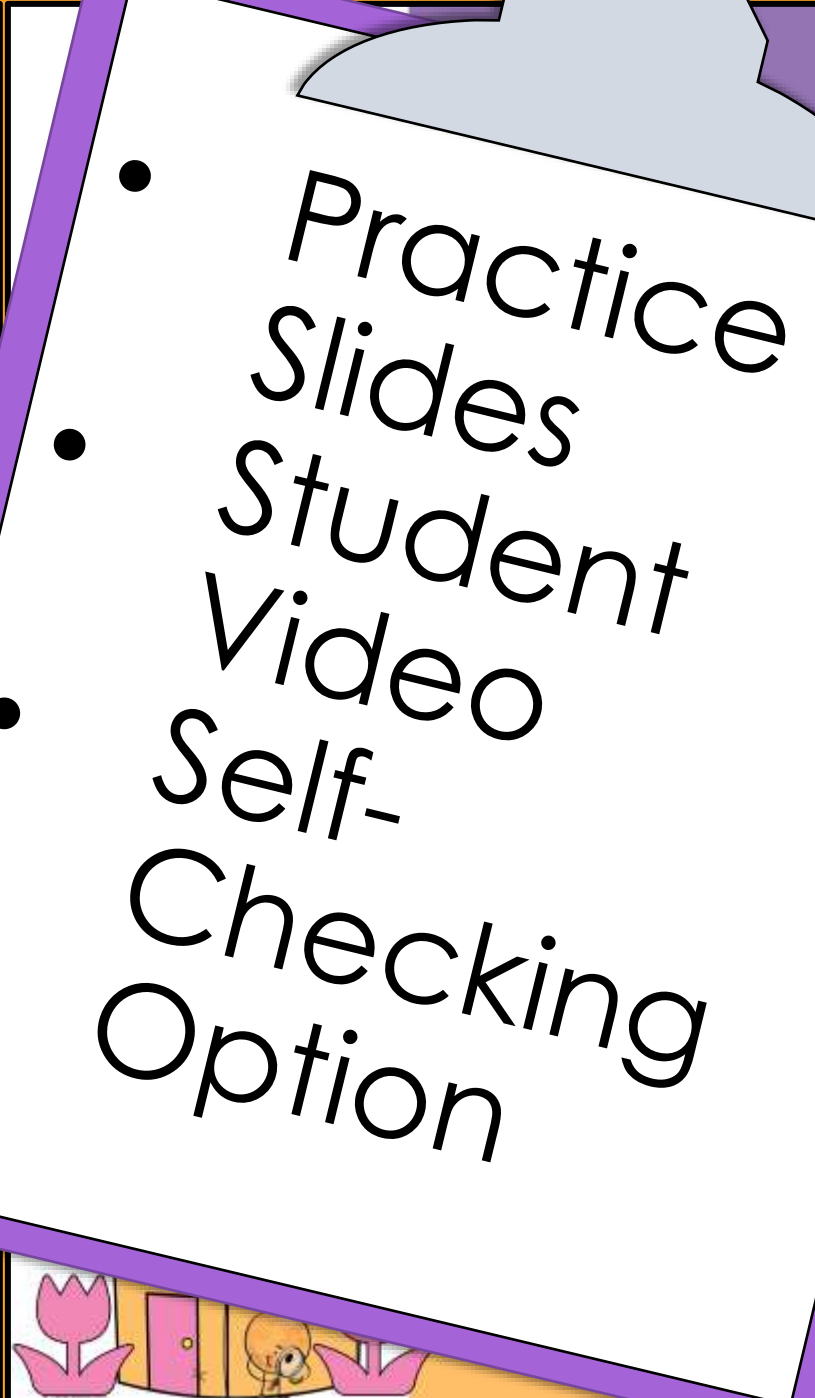

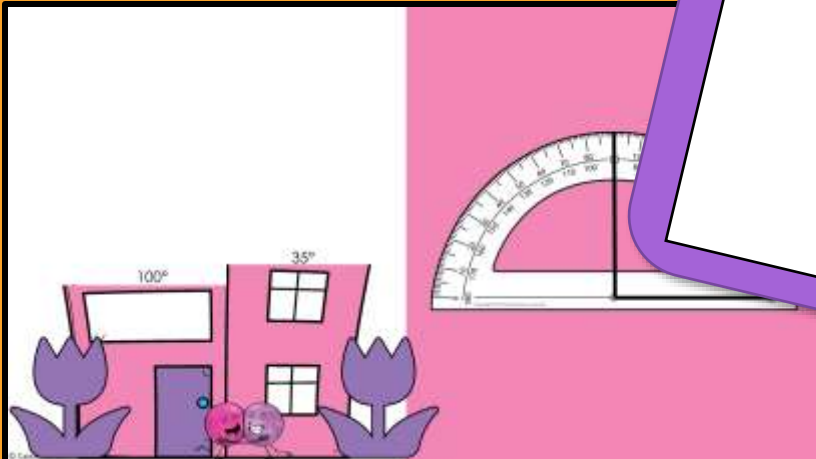

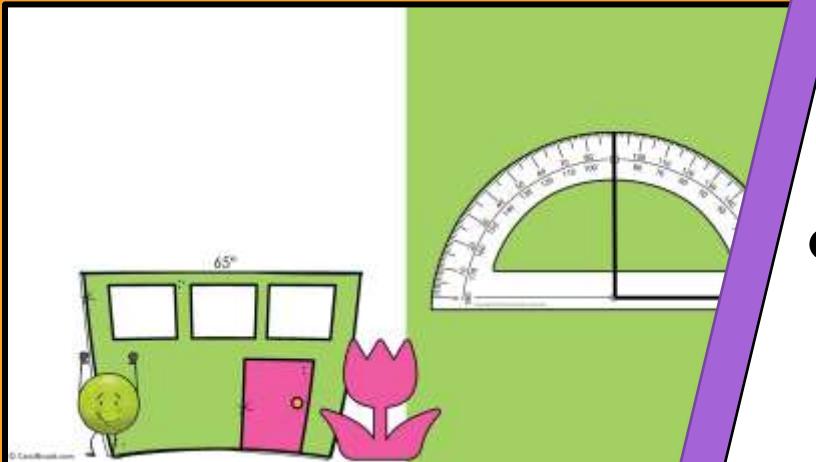

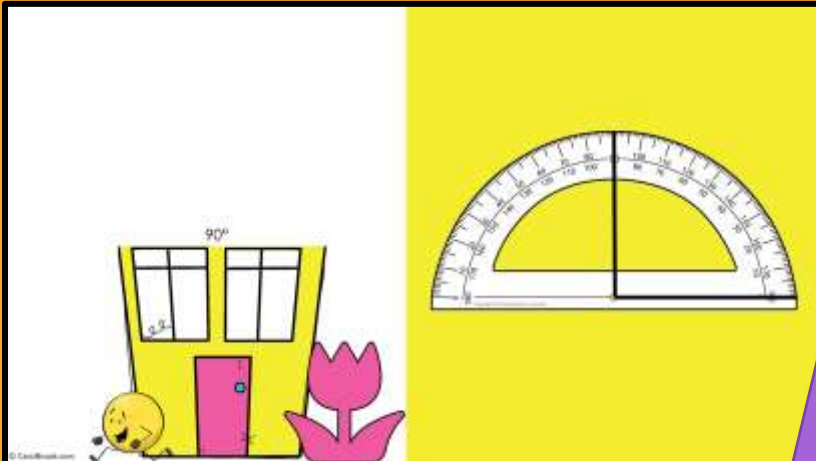

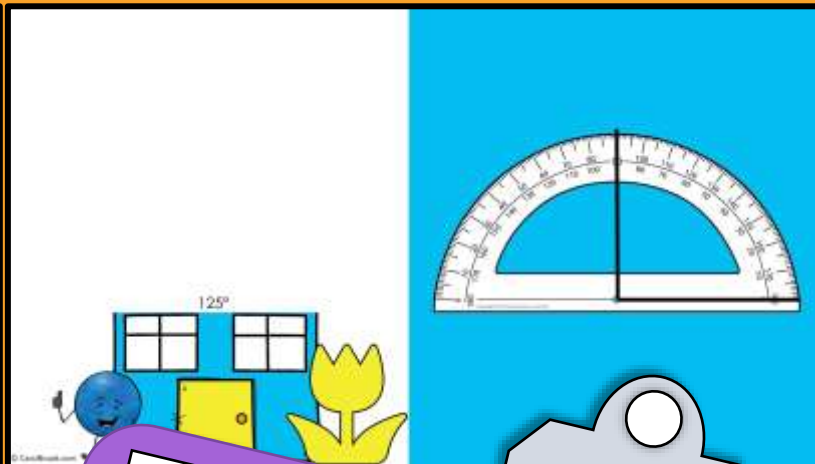

DIRECTIONS:

Create a pitched roof with the given angle measures. Use the protractor to draw the angle that will become the roof for each house.

TRICKS TO MAKE THIS EASIER!

- Step 1: Create your angle
 - ▶ grab the blue dot to rotate
- Step 2: Group your segments.
 - ▶ select them and click CTRL + ALT + G
- Step 3: Rotate your roof
 - ▶ grab the blue dot to rotate
- Step 4: Resize your angle to fit the house
 - ▶ press SHIFT while you drag the blue square

- Student Video
- Self-Checking Option

SAVE MONEY! Grab the Bundle!

The cover features a red circle with '4-6' in the top left, the word 'ANGLES' in large teal letters, and a smaller 'BUNDLE' banner below it. A grid of ten activity thumbnails is shown, with titles like 'Measuring Angles', 'Drawing Angles', and 'Angles, Circles, & Squares'. At the bottom, it says 'GOOGLE SLIDES ACTIVITIES', 'INSTRUCTIONAL VIDEOS FOR EVERY ACTIVITY!', and includes a 'BIG SAVINGS!' banner and a circular logo for 'Classroom Connections' with a cartoon teacher's face.

What teachers
are saying:

This was so fun!!!! So
much better than just
creating boring angles!
My kids loved it! THANK
YOU!
